Professional Summary

Operations Leader at Get Impeccable, driving technology adoption and operational efficiency for remote facilities and youth groups. Skilled in transforming complex data into actionable insights that improve productivity, financial tracking, and risk management. Proficient in Python, SQL, Excel, Power BI, and pandas, with hands-on experience in predictive modeling, AIOps monitoring, and credit-risk analysis. Very passionate and dedicated to empowering young people in remote areas. Facinated by AI interventions and schemes for effective team productivity.

Professional Experience

Operations Leader, *Get Impeccable* 11/2025 – Present
Nairobi, Kenya

- Coordinate community outreach programs connecting students to personal development and digital-skills opportunities.
- Spearhead a career optimization project for 60+ young people in remote universities, enhancing effective use of digital tools.
- Facilitate access to a menstrual tracking tool for youth in Kenyan slums, reducing the burden of unexpected cycles and enabling better planning

IT Support & Systems Data Assistant, *PINNACLE CONSTRUCTION CO. LTD (PCC)* 09/2026 – Present
Accra, Ghana

- Operational Data Integrity: Maintained 100% operational data integrity across department functions by conducting structured data analysis and producing comprehensive technical documentation for IT infrastructure systems.
- Performance Reporting Enhancement: Facilitated a 20% improvement in executive decision-making speed by delivering daily system administration reports and real-time infrastructure performance metrics.

Data Analytics Intern, *Future Intern* 06/2025 – 08/2025
Remote

- Reporting Efficiency Optimization: Accomplished a 30% increase in departmental reporting efficiency by building automated analytics pipelines in Power BI and Excel to streamline the processing of complex engagement datasets.
- Digital Engagement Analysis: Improved data-driven outreach strategies by utilizing Python to analyze digital engagement metrics, ensuring 100% accuracy in performance tracking and stakeholder reporting.

Volunteer, *Angaza Technology Center* 05/2026 – 09/2026
Kenya

- Mentored 45+ high school students through virtual tech sessions focused on digital literacy and STEM learning.
- Designed interactive modules that introduced students to coding, data analysis, and problem-solving with digital tools.
- Guided participants in applying STEM concepts to real-world challenges, fostering confidence and career readiness in remote communities.

Skills & Technologies

Professional Skills: Data Analytics, Predictive Analytics, Financial Data Modeling, SLA Monitoring, Credit Risk Prediction, Database Management Tools & Technologies: Python (Pandas, NumPy, Scikit-learn), SQL (MySQL, MongoDB), Power BI, Excel (Advanced), Flask, REST APIs, Git/GitHub Languages: English (Fluent), Twi (Native), Arabic (Intermediate)

Featured Project

AIOps & System Monitoring Engine, *Python, Predictive Analytics, Automation*
Live Demo: https://github.com/Hamdallah-alhassan68/AIOPs

- Developed an AIOps workflow to track system log telemetry, perform metric anomaly detection, and automate operational incident alerting.
- Engineered structured data pipelines to ingest real-time performance datasets, reducing manual monitoring overhead and troubleshooting latency.

Credit Risk Assessment Web App, *Python, Flask, HTML, CSS, Machine Learning*
Live Demo: https://creditworthiness-risk-assessment-project.onrender.com

- Built a web app for banking staff to assess customer loan repayment likelihood.
- Developed the interface with HTML, CSS, and Flask, integrating machine learning for prediction.

Leader Experience

Yale Model African Union (YMAU), *Ambassador*
Represent and promote YMAU programs and initiatives among students and young professionals.

Millennium Campus Network (MCN), *Global Admissions Committee Member*
Review and evaluate applications from prospective student leaders worldwide.

Millennium Campus Network (MCN), *Campus Director*
Lead campus initiatives focused on social impact, leadership development, and student engagement.

Education & Certifications

BSc Applied Computer Technology, *United States International University-Africa* 2024 – 2028
Relevant Coursework: Algorithms & Data Structures, Web Development, Database Systems, AI Fundamentals, Cryptography & Network Security, Internet & Network Protocols, Distributed Systems, Machine Learning. Kenya

Certifications

- Google Analytics Professional Certificate
- Cisco CCNA: Introduction to Networks

Awards & Achievements

- Mastercard Foundation Scholar
- Dean’s List (USIU-A)
- Campus Director (Millennium Campus Network)
- African Science Academy Scholar
- Yale Model African Union Delegate
